// CONFIDENTIAL

## 01. /executive\_summary

Establish a zero-code pipeline to automate end-to-end execution. This architecture of authenticity ensures your platform is delivered with precision and uncompromised quality. We defined the architecture focus, execution sequence, and required skill matrix to execute this vision seamlessly.

## 02. /architecture\_focus

Implement these core design principles to enforce the Architecture of Authenticity.

## **Bento Grids**

Layout Structure

Maximize scanability and organize content blocks logically.

## **Resonant Stark**

Visual Hierarchy

Ensure high contrast, stark typography, and a clean visual hierarchy across all interfaces.

## **60fps Animations**

Motion Design

Deliver butter-smooth motion, eliminate jank, and tie animations tightly to scroll and interaction events.

## **Playwright Visual Verification**

QA Automation

Enforce QA by catching visual regressions and running pixel-perfect assertions before any release.

# 03. /workflow\_execution

Trigger /startcycle to initiate the rigid agent handoff sequence.

PENDING

DONE

BLOCKED

☐

Gather Requirements

Product Manager

PENDING

Define feature scope and outline the acceptance criteria.

☐

Design Architecture

Frontend Architect

PENDING

Design the component tree, structure state management, and enforce SOLID principles.

☐

Implement Motion

GSAP Motion Engineer

PENDING

Apply 60fps animations, sequence timelines, and inject physical realism into interactions.

☐

Execute Verification

QA Specialist

PENDING

Execute the Playwright test suite, verify visual integrity, and approve the pipeline release.

# 04. /required\_skills

Activate the following explicit skills to empower the agent execution matrix.

## **impeccable**

UI/UX Hardening

Polish the UI, optimize the UX, and harden the core components.

## **frontend-design**

Production Interfaces

Build production-grade interfaces and explicitly reject generic AI aesthetics.

## **ui-ux-pro-max**

Design Intelligence

Inject deep design intelligence, apply strict color palettes, and audit component accessibility.

## **web-design-guidelines**

Code Review

Review UI code comprehensively and enforce strict Web Interface Guidelines compliance.

## 05. /communication\_protocol

Strategic Decision

High Impact

### **Caveman Full Mode Globally**

Enforce Caveman Full mode across all communications. Drop articles, use fragments, and save tokens while retaining 100% technical accuracy.
